# Zero One Group's Skill Test

Please feel free to reach out to me if you have any questions or if you need more time! Please select one of the following skill tests if applicable.

For programming tasks, please put the final code on a private repository on GitHub, GitLab and BitBucket. Share the repository with GitHub users anthony-khong, rubiagatra, and psykk if you are using GitHub, otherwise invite anthony@zero-one-group.com, doni@zero-one-group.com and kevin@zero-one-group.com on other platforms.

Frontend Test: Login Page with React

Requirements:

- You must use TypeScript and React.
- You can use plain CSS, Styled-component, Emotion, or any UI component.
- You can use any hooks, react-query, or state management.
- Bonus points for picking Zero One Group's default choices, namely:
    - Setting up your application using [Nx](#).
    - Deploying with one of [Heroku](#), [Vercel](#), [Netlify](#), [Firebase](#) or any other platform for serving the application.
    - Creating a [Storybook](#) component.
    - Creating a unit and/or functional test component.
    - Setting up a simple CI pipeline to run unit tests.
    - Clear README with instructions for common tasks such as building, serving and testing.
